# Enterprise Architecture
## Training, Education, and Certification

We educate executives and practitioners on how to build an Enterprise Architecture. Our work is based on sound principles formed from actual practice and applications, and a theoretical body of knowledge.

To build an Enterprise Architecture, human resources with the right knowledge are required. The Enterprise Architecture Center Of Excellence (EACOE) offers Enterprise Architecture (EA) Training, Education and Certification—providing you with hands-on experience and tools to develop organizational and individual skills essential for successful EA implementation. We also provide a path to the globally recognized certification based on approaches that ensure alignment with current best practices.

To educate future practitioners, we use both formal and informal tools. The tools are based on a proven methodology that is backed by domain expertise which will allow your organization to find the delicate balance between information technology (IT) and business strategy. To demystify the actual practice of EA, we equip individuals and organizations with the knowledge about the importance of aligning human and technology resources with the business strategy.

The EACOE methodology is based on the frame of reference/ontology outlined by John Zachman and The Enterprise Framework.

## The EACOE Approach:

- Actual practice with EA

- Thorough understanding of EA theory

- Sound practical principles and skills

- Hands-on exercises reviewed by experienced EA architects

- Understanding of the right balance between business strategy and IT

- Integrated tools for practitioners to facilitate an EA implementation

- Globally recognized Enterprise Architect certification

*All services are offered on a fixed-fee basis.*

## Offerings

*1 Day Introductory Seminar*—Understand the practical and theoretical body of knowledge; and understand the actual practice of EA and its importance to building and maintaining highly effective agile organizations.

*4 Day Practitioner Certification Workshop*— Provides the path to a globally recognized certification through hands-on participation in an EA Workshop, using proven principles and tools that is reviewed by experienced EACOE Enterprise Architecture Practitioners.
